

Day WINES

94pts Wine Enthusiast
"Extended-skin contact fans will want to add this wine to their collection. It is a blend of Viognier, Pinot Gris and Muscat that fermented on skins for 23 days before resting in a combination of 90% neutral French oak, 5% new French oak and 5% new Acacia. Ripe melon, guava, rose hips and plumeria aromas are flanked by crushed brick dust and a note reminis-

cent of an orange-flavored Flintstones chewable vitamin. The wine has grippy tannins and a chalky texture to go along with flavors such as beeswax, chamomile tea, peach skins and honey. Editors' Choice." — Michael Alberty
